The Italian Job

Teacher's Guide

Grade Level: 3–5

Curriculum Focus: Language Arts

Lesson Duration: One class period

Program Description

Four writing implements must save the world from the clutches of a permanent marker gone bad. With his sidekick, Dottie, and his own small army, the evil Dark Marker makes a claim for global domination by stealing prefixes and suffixes from a local newspaper and hiding out in Italy. Penny the pencil, Buzz the PDA, Florentina the fountain pen, and Arturo the gel pen discover Dark Marker's plot and solve clues about grammar rules to save the world from communication chaos.

Discussion Questions

- How can a prefix or suffix change a word?
- What ancient language gave English many of its root words?
- How can you use prefixes, suffixes, and roots to discover the meaning of unfamiliar words?

Lesson Plan

Student Objectives

- Identify prefixes, roots, and suffixes.
- Analyze word parts to determine the meaning of unfamiliar words.
- Explain the development process in defining unfamiliar words.

Materials

- *Pendemonium: The Italian Job* video
- 5 x 8 blank note cards, 5 per student
- Blue, black, and red pens
- Dictionaries

Procedures

1. After viewing *Pendemonium: The Italian Job*, explain that students will use prefixes, suffixes, and roots to help them discover the meanings of unfamiliar words.
2. On the board, display the following formula: prefix + root + suffix. Write "prefix" in red, "root" in black, and "suffix" in blue. Refer to the video and explain that prefixes are found at the beginning of a word, roots are in the middle, and suffixes are at the end.
3. Next, write "recycling" on the board in black. Have students identify its root, prefix, and suffix. Below recycling, write "re" in red, "cycl" in black, and "ing" in blue. Discuss the meaning of each word part and write its definition in the same color. Therefore, write "do over" in red beneath "re" and below "cycle" place "circle" in black. "Present tense of verb" is below "ing."
4. Ask students to create an informal definition of recycling based on its prefix, root, and suffix. Explain that informal definitions use clues such as word parts, context, and the students' prior knowledge. Student definitions may include using something over again or using something in a different way.
5. Have students check their responses by looking up the word in their dictionaries. Write the definition of recycling below its word parts.
6. Create a simple diagram that clearly shows the meaning of recycling.
7. Have students brainstorm unfamiliar words from a current reading selection, social studies text, science lesson, or newspaper. Write students' responses on the board.
8. Then distribute five index cards to each student.
9. Ask students to select five words listed on the board. Students will complete the following steps for each word:
 - Write the entire word at the top of the index card.
 - Divide the word into its prefix, root, and suffix. Write the prefix in red, root in black, and suffix in blue.
 - Create an informal definition for the word. Use a dictionary to check the definition. Write the informal definition.
 - Illustrate the meaning of the word.
10. Ask each student to share one word card with the class and explain how he or she developed the word's definition and illustration.
11. Discuss the differences and similarities between students' word cards, especially those that highlight words with multiple meanings.
12. Use a variety of student cards to create a bulletin board display about prefixes, suffixes, and roots.

Assessment

Use the following three-point rubric to evaluate students' work during this lesson.

- 3 points: Students identified the prefixes, suffixes, and roots of five words, created comprehensive meanings and illustrations of self-selected unfamiliar words, and explained fully the development process in defining unfamiliar words.

- 2 points: Students identified the prefixes, suffixes, and roots of three or four words, created basic meanings and illustrations of self-selected unfamiliar words, and explained the development process in defining unfamiliar words.
- 1 point: Students identified the prefixes, suffixes, and roots of two or less words, were unable to create basic meanings and illustrations of self-selected unfamiliar words, and could not explain the development process in defining unfamiliar words.
